

## Accessory Tray for the NexStar N5(i)/N8(i) telescopes

The standard tripod of the NexStar N5(i)/N8(i) telescopes has a very small holder for a few eyepieces. Therefore Dory Hayes developed a larger accessory holder made from ¼" acrylic material which supports not only more eyepieces but also provides space for other accessories. I received one of the prototypes from his first batch and love that device. Dory was kind enough to offer an individual text engraved on the tray and I have chosen "CELESTRON NexStar Nxi". Below please find some pictures of the tray attached to my N5 tripod which features a built in wedge. In my accessory tray I had to drill one additional hole to accommodate the rod used to adjust the latitude of the wedge. Dory will most likely include it in future batches.

Tray as received from Dory Hayes

Tray mounted at N5(i) tripod

One additional hole has to be drilled in the tray for the latitude adjuster

For further information please also visit the homepage of Dory Hayes which can be found at [www.impact9.com](http://www.impact9.com). Dory can be reached under the Email address [dh@impact9.com](mailto:dh@impact9.com). I want to thank Dory for this great accessory.

Questions and comments are always very welcome.

Best regards

Matthias
